

APEX

Token redistribution token

Whitepaper

Algorand Apex

INTRODUCTION:

The Apex Whitepaper aims to educate readers on our vision, strategy and roadmap. Below we illustrate in detail our unique redistribution mechanism.

We are happy to improve upon the new protocol on Tinyman and are excited to showcase the new use cases that this will enable.

Safemoon was the one to bring awareness around RFI and HODL rewards. Apex will carry the innovation forward. We will share our vision with the world: the improved reward mechanism.

Right into it:

Apex is the next evolution of a decentralized contract on the Algorand Chain (ALGO): It is a real estate inspired project.

We will be partnering with some real estate companies and thereby, bringing them to the awareness of Algorand and Apex. We will enable our investors to look into acquiring properties for themselves and help them

secure a better future by redirecting their monthly rewards into a Hodling account that will grant them the access to partake in shares and development of real estate.

A verification badge will be introduced next month which will help us give status and authenticity of investors' shares. In that case putting everything visible before the community.

We will be working with a couple other apps to generate a structural system. Connecting our investors/hodlers to real estate developments and enabling them to get shares and possible returns.

REWARD

You get rewarded in Token redistribution every 24hrs and In Algo every week at an average hodling amount with the snapshot data.

Under finance management within the Real Estate Sectors, we branch a system that will enable hodlers be part of real estate plans and development. The token contract employs a rewards system;

5% is redistributed to holders

10% in Algorand every one week.

3% is used to fuel the liquidity pool exchange growth.

UNDERSTANDING APEX

In order to fully understand the Algorand redistribution, we need to educate you on the reflection concept:

Classic redistribution

This is a concept that was popularized by Safemoon. The mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buys and sells). Redistribution is based on percentage (in the contract), current token balance and number of holders.

Liquidity Providers:

Liquidity providers are the strong structures within the engine of this project and hence, are entitled to so many privileges.

Apex redistribution

Manually is unintuitive for a couple of reasons but, in this case you will receive your tokens through manual

distribution. Time constraints as you need to Hodl to qualify for your redistribution. The way it works for holders: You buy tokens and hold them, every 24hrs minutes you'll manually receive Apex in your wallet. Not a single action is required. This will help regulate bots or weak hands.

Your Apex tokens amount is persistent and won't change.

SNAPSHOT TIMER:

Snapshot takes place three times every day before average result and then rewards are sent.

BEHIND THE SCENE

The contract keeps track in an array of all token holders. Every transaction processes a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens)

-

THE SYSTEM

This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully manual for a reason. Minimum token balance is 20\$ Apex tokens to receive Apex distributions.

WHAT IF I SELL BEFORE SNAPSHOTS?

The stars are bright but your bags are brighter when you Hodl.

APEX LAUNCH

Algo Apex will be launched Immediately tinyman is up, 2021.

-

DEX LISTING

Following the presale, Apex tokens will become available for purchase on Tinyman.

NFT LAUNCH

APEX will have its NFT launch just after the launch of the Apex token and will first be distributed to first 50 top hodlers.

Apex NFT will be launched for 20 Algos.

Top 100 first buyers of Apex NFT qualifies for our bounty rewards at the end of the month.

TOKEN INFORMATION

NETWORK: ALGO APEX

Ticker: APEX

CONTRACT ID:

- TOTAL SUPPLY : 10,000,000
- TOKENS FOR TINYMAN LISTING : (30%)
- TOKENS FOR MARKETING/REWARDS WALLET:
(30%)
- DEVELOPERS WALLET: 1,000,000 (10%)
